DETAILED ACTION

Species Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PTC Rule 13.1

1) **SEQ ID No 5, SEQ ID No 6.** Applicant is required to choose one specifically named **polynucleotide** as recited in claims 8, 9, 17, 18, 28 and 29.

The species are independent or distinct because the **polynucleotide** comprises promoter regions and the ribosomal binding sites of the *gac* gene with distinct structures resulting in different functional properties.

Applicant is required under 35 U.S.C. 121 and 372 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1 and 20 are generic.

In view of the distinction of species as set forth in the above paragraphs, it would be unduly burdensome for the examiner to search and examine more than one of the elected patentable distinct species for each one of the groups of species listed above.

2) **carbohydrate or glycerol,**

Applicant is required to choose one specifically named **substrate** as recited in claim 39.

Art Unit: 1633

The species are independent or distinct because the different **substrates** result in different conditions of fermentation broth and results. For example, complete consumption of the initial glucose present in the medium is critical for product formation.

Applicant is required under 35 U.S.C. 121 and 372 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1 and 20 are generic.

In view of the distinction of species as set forth in the above paragraphs, it would be unduly burdensome for the examiner to search and examine more than one of the elected patentable distinct species for each one of the groups of species listed above.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
